Summary

Full Stack Developer with 2 years of experience building scalable web applications and high-performance e-commerce systems. Specialized in backend architecture, API development, and performance optimization, delivering measurable growth through data-driven decision-making and technical innovation. Seeking to contribute to product-focused teams building robust and scalable digital platforms.

Experience (2 years)

FULL STACK DEVELOPER | PUSHPLINEN | JANUARY 2024 – PRESENT

- Engineered and optimized a Shopify-based e-commerce platform, enhancing scalability and performance.
- Customized themes and dynamic product variants, increasing customer engagement by 35%.
- Reduced page load time by 40% through backend optimization and database tuning.
- Executed SEO and paid marketing strategies, boosting organic traffic by 50% and improving ROAS by 2.5x.

Implemented A/B testing and CRO strategies, increasing checkout conversions by 28%.

SOFTWARE DEVELOPER INTERN | RACHANA GROUP | FEBRUARY 2023 – OCTOBER 2023

- Developed a scalable e-commerce platform using modular backend architecture and responsive frontend design.
- Optimized REST APIs and backend workflows, reducing response time by 30%.
- Implemented authentication and role-based access using Spring Security.

Integrated cart and order modules with secure API communication.

Skills

Backend	Frontend	Database	DevOps & Cloud	E-Commerce	Digital Marketing & Design
Java (DSA)	Angular	SQL	GitHub	Shopify	SEO
Spring Boot	React	MySQL	Docker	Shopify Liquid	Google Ads
JavaScript	HTML5		Linux	JSON	Meta Ads
TypeScript	CSS3		Git	Custom Liquid	
Python	REST APIs		AWS	Payment Gateway	
Node JS					

Education

VISHWAKARMA INSTITUTE OF INFORMATION TECHNOLOGY | PUNE | B.TECH. | 2023

Projects

TOM-MART (Amazon-Inspired E-Commerce Platform) - May 2024

- Created a scalable full-stack e-commerce application using **Java, Spring Boot, Angular, and MySQL**, supporting 1,000+ concurrent users. Built secure **RESTful APIs** for authentication, product management, and order processing with role-based access control. Integrated **AWS deployment** and optimized database queries.

SEEMLESS-PAY (Secure Payment Platform) - Aug 2024

- Engineered a secure payment handling platform using **Spring Boot and Angular**, applied REST APIs for transaction handling and validation. Planned a database-driven payment tracking system ensuring data integrity and reducing transaction errors by 20%.

Tech Stack: Java, Spring Boot, Angular, SQL, HTML, GitHub

Blanki.in (Secure Payment Platform) - Aug 2024

- Currently developing an e-commerce website **https://blanki.in/** using the Shopify platform.
- Working on **Shopify theme customization using Liquid, HTML5, CSS3, and JavaScript** to build a responsive and modern storefront.
- Implementing **custom product pages, collections, and UI/UX improvements** to enhance customer experience and conversion rate.

- Integrating **Shopify apps, payment gateway configurations, and performance optimizations** for smooth store functionality.
- Ensuring **mobile responsiveness, fast loading speed, and SEO-friendly structure** for better user engagement.

Certifications

- Java Programming Certification – Besant Technologies
- SQL and Relational Databases 101 – IBM Cognitive Class
- Python 101 for Data Science – IBM Cognitive Class
- Machine Learning with Python – IBM Cognitive Class
